

Zumwalt Prairie Preserve Hunting Rules - Seasons 258A1-2, 258T, 258R1

Hunting is an important part of The Nature Conservancy's (TNC) management of the Zumwalt Prairie Preserve. The hunting program is designed to benefit habitats as well as provide for exceptional hunting experiences. However, hunting on this private land is a privilege and **your permission may be withdrawn at any time. Violators of TNC policies will immediately lose access privileges. Violators of state laws will face prosecution.**

- All hunters must have been **granted permission by TNC** to hunt on the Zumwalt Preserve.
- Hunters must print and sign hunting permission slip prior to hunting, you will receive this with your notification email. Please print and display on your dash or a visible location in your parked vehicle while hunting on the preserve.
- **Discharge of a firearm is not allowed within 100 yards of a public road on the prairie or within 50 yards of a public road in the canyons.** For safety reasons, we require hunters to move away from public roads before firing.
- **258R1** tag holders are only allowed to harvest an antlerless elk.
- **258T** tag holders must schedule with TNC prior to hunting the preserve.
- There is **no motorized access off public roads.**
- **Antlerless elk are the only animals to be harvested.** Shooting at any other animal or object is not allowed.
- **Hunt in a sportsmanlike manner.** Any wasteful or otherwise disrespectful activity towards elk or other hunters will result in loss of access for the remainder of the season and future seasons.
- **Do not trespass on our neighbors.** Look for property boundary signs and metal flashing on fences indicating change in ownership.
- **Have proper licenses and tags** while in the field and produce these documents if requested.
- **Do not enter the "Closed Areas"** as indicated on the maps provided. You may pack harvested elk out to the public road through the closed area in Camp Creek, but you are not allowed to travel from the public road to the north through the closed area in Camp Creek. See hunt map for "Closed Area" boundary and to determine access points.
- **Access to the preserve is by foot or horse/mule only.** Stock may be used with prior Conservancy approval (stock must be fed certified weed-free hay or pellets for at least 4 days prior to entry).
- **Be sure of your target and beyond.** Cattle may be present during hunting seasons. There are no two-for-one elk tags, ensure you are not shooting into a herd with the possibility of killing or injuring more than one animal.
- **Do not remove anything** from the preserve other than the game you are hunting (this includes shed antlers and skulls).
- There is **no smoking or open flame** of any kind on the preserve.
- There is **no camping** on the preserve.
- Leave gates open or closed as you find them.
- Hunters may bring up to two guests onto the property to assist with their hunt. Only hunters with permission to hunt on TNC may carry a firearm.
