

# The Amazing Lives of Sea Turtles

These special creatures start their journey as tiny eggs buried in the sand. Once hatched, they're called hatchlings and waste no time dashing to the ocean. As they grow, they spend their days swimming, eating and exploring. As adults, female turtles return to the same beach where they were born to lay their eggs, starting the cycle again.

Let's cut out each stage of their life and put them in order to see their incredible journey!
